

Java Developer Job Description

Position

Java Developer

Job Summary

We are looking for a skilled Java Developer to design, develop, and maintain high-quality Java applications. The ideal candidate should have strong knowledge of Java programming, object-oriented design principles, and experience working with modern frameworks and databases.

Responsibilities

- Develop, test, and maintain Java-based applications.
- Write clean, scalable, and efficient code.
- Collaborate with cross-functional teams to define and implement new features.
- Debug and resolve technical issues.
- Optimize application performance and ensure reliability.
- Participate in code reviews and maintain coding standards.
- Create and maintain technical documentation.

Required Skills

- Strong proficiency in Java (Java 8/11/17).
- Knowledge of Object-Oriented Programming (OOP) concepts.
- Experience with Spring Boot, Spring MVC, and RESTful APIs.
- Familiarity with Hibernate/JPA.
- Experience with SQL databases such as MySQL, PostgreSQL, or Oracle.
- Understanding of Git and version control systems.
- Knowledge of Maven or Gradle build tools.

Preferred Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Experience with microservices architecture.
- Familiarity with cloud platforms such as AWS, Azure, or GCP.
- Knowledge of Docker and Kubernetes.
- Understanding of CI/CD pipelines and Agile methodologies.

Key Technologies

- Java
- Spring Boot

- Hibernate
- REST APIs
- MySQL/PostgreSQL
- Maven/Gradle
- Git
- Docker
- Kubernetes
- AWS/Azure

Experience

- 0–2 years: Junior Java Developer
- 3–5 years: Mid-Level Java Developer
- 5+ years: Senior Java Developer
