PROFILE SUMMARY

Motivated and meticulous **B.Tech. Artificial Intelligence and Machine Learning** student passionate about building innovative web applications using Java and modern technologies. Proficient in **Python, Java, Spring Boot, HTML, CSS, JavaScript**, and familiar with **AWS cloud practices**. Seeking an opportunity to begin a career as a **Web Developer** to contribute to intelligent, scalable software systems.

EDUCATION

B.Tech. Artificial Intelligence and Machine Learning	2022 – 2026
IFET College of Engineering, Villupuram	CGPA: 7.1 / 10
Higher Secondary (HSC)	2021 – 2022
SRV Matric Higher Secondary School, Samayapuram	

TECHNICAL SKILLS

Programming:	Python, Java
Web Development:	HTML, CSS, JavaScript, Spring Boot, React
Database:	MySQL, MongoDB
Tools:	VS Code, Git, GitHub, AI Tools
Cloud:	AWS (EC2, S3, IAM)

CERTIFICATIONS

- Build & Fly Your Own Drone – AIC PEC Foundation
- Build & Develop Your Own Arduino – AIC PEC Foundation

PROJECTS

9x9 Grid Optimization for Seamless Traffic Flow	Ongoing – 2025
– Built with Java, Spring Boot (backend), and React (frontend) using REST APIs for seamless data exchange. – Implemented secure and scalable data management and integrated geolocation services for accurate vehicle monitoring. – Designed user-friendly interfaces and intelligent modules for incident classification and automation.	
Smart Product Scanner and Expiry Reminder	2024
– Developed a mobile-based product scanner using barcode/QR code technology to fetch product details. – Displayed product information including name, category, and expiry date with a user-friendly interface. – Implemented expiry reminder alerts and maintained scan history (daily, weekly, monthly).	

INTERNSHIPS

Full Stack Web Developer Intern – MACX Technologies, Cuddalore	Jul 2024
– Contributed to full-stack web development using Java, Spring Boot, HTML, CSS, and MySQL. – Collaborated in an agile environment, writing and optimizing code for better performance. – Strengthened understanding of SDLC and project management.	
Cloud Computing Engineer Intern – ClouLogic Technologies	Jan 2025
– Practiced core cloud computing concepts and deployment using AWS. – Configured EC2 instances, servers, and databases for project environments. – Learned about load balancing, backups, and automation.
